NETGAIN TECHNOLOGIES

Essential Security

Every organization must be prepared for today's cyber threats. NetGain provides comprehensive essential security solutions and services for businesses to maintain a minimal level of risk.

Our Essential Security Services Deliver:

- Seasoned **Virtual Chief Security Officers** (vCSOs) who work with your leadership team to evaluate your current security posture and offer guidance for improvement.
- Ongoing **Security Testing and Training** to empower your entire organization with the knowledge needed to recognize and respond to cyber threats.
- **Security Assessments** to identify vulnerabilities across your technology environment. NetGain helps with everything from cyber insurance documentation to executive planning and audit preparation.

Essential Security: Building Your Foundation

Incident Response Planning (IRP)	If something goes wrong, it's critical to have a plan. We help you build and test an incident response strategy—so your team knows what to do, who to call, and how to recover quickly.
vCSO Strategic Consulting	Our Virtual Chief Security Officers (vCSOs) are Certified Information Systems Security Professionals (CISSPs) who bring deep expertise and attention to your business. Through our concierge-level service, we assess your current environment and develop a plan for proactive defense.
Risk & Compliance Assessments	We perform annual risk assessments to assess your environment for vulnerabilities, quantify your risk, and provide a clear action plan. We'll help with security compliance and regulations across major industries.
Security Awareness Training	We deliver continuous education and training to employees that's hands-on, relevant, and proven to build a stronger security culture.
Vulnerability Management	Think of this as regular health checks for your network. We run scans to find weaknesses before cybercriminals do—then develop a plan to fix them.

NETGAIN TECHNOLOGIES

Essential Security

NetGain is Internationally Recognized as a Top 250 Managed Security Services Provider (MSSP)

Additional Security Services

Depending on your industry, you may require additional services.

Managed EDR (Endpoint Detection & Response)
Our SOC (Security Operations Center) is fully in-house, with 24/7 monitoring from experienced security engineers. We detect suspicious activity on your endpoints and act fast to stop it, isolating infected devices and preventing attacks from spreading.

Managed ITDR (Identity Threat Detection & Response)
We monitor your Microsoft 365 environment to protect user identities. This service blocks suspicious login attempts, detects shadow IT, stops malicious inbox rules, and reduces the risk of business email compromise.

Managed SIEM (Security & Information Event Management)
This is deep-dive threat hunting with enterprise-grade tools. We provide full visibility into your cloud, backup, and on-prem environments, with real-time threat detection, unlimited log storage, and advanced investigation capabilities.

DNS Filtering
With our DNS filtering solutions, gain visibility into business sites and off-network devices with detailed reporting. NetGain's AI-powered DNS solution blocks malicious websites in real time, supporting compliance measures and increasing employee security with content control.

Compliance Standards

Our certified security engineers are experienced in navigating regulations and compliances across industries:

- CMMC
- HIPAA
- NIST
- PCI – DSS
- CJIS
- GLBA
- FISMA
- 21 CFR Part 11
- HACCP
- COBIT
- SOX
- And more

Essential Security On-boarding Services:

- Business & Administrative Oversight
- Physical Oversight
- IT & Technical Oversight
- Compliance Oversight
- Project Oversight
- Audit Assistance
- Cybersecurity Education
